Hon. Hugh J. Addonizio
Mayor
City Hall
Newark, New Jersey

Dear Sir:

The Annual Report of the Newark Fire Department for the year ending December 31, 1968, is herewith respectfully submitted.

The various activities and operations are detailed in the Division reports appended hereto.

During year 1968, the Newark Fire Department was severely tested by a record number of 8,514 fires. The Members of the Newark Fire Department quickly and efficiently responded to this crisis, and only because of their courage and efficiency was the situation brought under control.

During 1968, 474 firemen were injured in the line of duty, and one, Edward Dennis, lost his life in the performance of his duty.

The primary function of the Fire Department continues to be the protection of life and property from the ravages of fire. We are determined that this life-saving operation must be carried out with a maximum regard for the safety of the members of the Newark Fire Department.

A number of assaults on firemen occurred during the year 1968. These assaults, plus recent harassment and interference on the college campus have highlighted the need for better police protection at the scene of fires. If severe physical attacks occur against firemen, they will be withdrawn from the scene of the emergency and will not return until such time as adequate protection can be provided.

In the future, we will continue to rely on law-enforcement agencies and the military for protection of fire personnel and apparatus. It is not possible for firemen to simultaneously combat fires and fight off mob attacks.

The Fire Department does have a legal and moral obligation to save lives and protect property from the ravages of fire. Every effort consistent with the safety of our men will be made to meet that obligation.

Following is a comparison of the fire losses for the past five years:

Total fire loss in 1964 -	\$4,272,123.87
1965 -	\$3,740,542.26
1966 -	\$4,718,542.37
1967 -	\$6,319,800.65
1968 -	\$5,930,366.97

Per Capita loss totaled \$14.64 for 1968, as against \$15.59 for 1967; \$11.64 for 1966; \$9.23 for 1965; \$10.54 for 1964.

Fire Department

Director's Report (Continued)

- 2 -

The number of lives lost as a result of fire in 1968 was 28, an increase of three over 1967.

25 lives lost in 1964
38 lives lost in 1965
37 lives lost in 1966
25 lives lost in 1967.

Total alarms in 1968 were 17,367; of these, 2,991 were false alarms.

The primary function of the Fire Department, the protection of life and property from fire, was performed in an exemplary and efficient manner. This accomplishment was due in large measure to the courage, dedication and efficiency displayed by the officers and members of the Department.

The overall Fire Insurance rating of Newark as determined by the American Insurance Association (formerly the National Board of Fire Underwriters) was second to none in the nation. Only 15 other communities throughout the country had as high an overall fire rating as that enjoyed by Newark.

Among the various activities of the Fire Department during the year 1968, I respectfully wish to call attention to the following:

An ordinance containing the National Fire Protection Code of the American Insurance Association (formerly the National Board of Fire Underwriters) prescribing regulations governing conditions hazardous to life and property from fire, was adopted. The adoption of this Code into law will give the Fire Department a more workable and efficient tool for safeguarding the citizens of the City.

A comprehensive Community Relations Plan with emphasis on human relations and recruitment was developed under the guidance of Deputy Chief Lawrence Caufield and Battalion Chief Robert Marron, with special emphasis on fire prevention, recruitment and community relations.

Our systematic apparatus and equipment replacement programs were continued through the year. These programs, in conjunction with the Preventive Maintenance Program at the fire house level and at the special company level, have placed this department in an excellent position from the standpoint of equipment and apparatus.

The apparatus and equipment and replacement program continued with the delivery and acceptance of the following in 1968:

1 Four-door Sedan Falcon for Fire Alarm and Radio
1 Station Wagon for Deputy Division 1
2 1000 G.P.M. Pumpers assigned to Engine Companies 2 and 9.

To be delivered in 1969: Pick up Truck 1-ton for Special Service. Van type truck for Training Academy.

Under the Capital Improvement Program :

On order to be delivered in 1969 or thereafter:

4 Diesel powered Aerial Trucks
1 Rescue Truck - bus type body
4 - 1000 Gal. pumpers diesel type

Fire Department

Director's Report (Continued)

-3-

The purchase of the above-mentioned equipment, in addition to the regular purchase of small appliances and tools, places the Fire Department in a very favorable position as regards modern apparatus, tools and appliances.

The inventory and standardization program of tools and equipment was continued in 1968.

The training program of the Department continued throughout the year with emphasis on the following:

1. The driver training program continued for the 9th consecutive year.
2. Mask drills were conducted by the various battalion chiefs.
3. Chief Drew continued the Radiological Training Course for all new Fire Department members at the Training Academy.
4. Daily drills were conducted in company quarters, in company districts and at the City Dock under the direction of Deputy and Battalion Chiefs.
5. The In-Service Inspection programs continued throughout the year with special emphasis on inspections of commercial, industrial and institutional buildings.

Supervisors of Apparatus Daniel Tauriello and Peter J. Carolan have continued the service-testing program and have also conducted Pump Classes at the Special Service Company.

Fire Prevention activities under Deputy Chief Joseph J. Drew and Battalion Chief Stanley Kossup and Physical Instructor John Murphy were conducted on a year-round basis. Some of the activities were -- an outdoor exhibit, films, Speakers Bureau, and distribution of hundreds of thousands of pieces of literature on Fire Prevention.

An indoor fire prevention display dramatically and interestingly brings to the public a fire prevention message, and proved again to be a most effective program. Special commendations were given to Chief Drew, Chief Kossup, Captain Carl Stoffers, Captain James Dalton, Fireman Shelton Harris and members of the Training Academy for this fire prevention activity.

All of the above, were displayed before various civic, fraternal, religious, etc., groups, and all are available to all groups requesting same.

A special kerosene heater float was on display throughout the city for several weeks, and fire prevention posters were displayed in store windows.

The Officers and Members of the Department performed excellent service during the past year, and it was my pleasure to commend many of them officially for outstanding rescues and acts of heroism. All fires occurring during 1968 were satisfactorily controlled and extinguished. Newark has good reason to be proud of its Fire Department.

Members of the Fire Department operated at many charitable drives that reflected great credit upon the Department; well in excess of \$26,000 was collected for the Mentally retarded.

Another new firehouse, Engine Company 32, was dedicated on December 13, 1968, located at Port and Doremus Avenue to service the Port area.

Fire Department

Director's Report (Continued)

- 4 -

A complete operational plan, including a plan for post attack and recovery is in effect as part of the Fire Department's Civil Defense Plan. In conjunction with this program, we have Geiger Counters, Dosemeters, Gamma Survey meters, air samplers, Alpha-Beta-Gama Ray and dustproof suits.

RECOMMENDATIONS

1. Salaries for firemen should be raised to \$10,500 per year. It is difficult to ask men who are members of the best, busiest, and most dangerous department in the State to be content with a lesser salary than that paid in neighboring communities whose problems do not compare with Newark's in any way.

Paid holidays and other fringe benefits should also be considered for the same reason as listed above.

2. A fire training area should be established to provide adequate training. A modern training facility is vitally needed if the City is to retain its top rate overall fire insurance rating.

3. The plan of fire station replacement must be continued. Many fire stations are very old - as much as 89 years old.

4. The continual purchase of new apparatus and up-to-date equipment should be carried on to maintain the Department at peak efficiency.

5. Our Educational Program must be continued. During 1968, 3 members attended the Urban Training Institute, 2 members attended the Fire Training Institute, and 3 members took a course in Fire Protection Technology given at the Newark College of Engineering.

Many other recommendations could be made; however, I have restricted myself to the above because I consider them to be so vitally important to the efficient operation of the Fire Department in the immediate future.

On behalf of the Fire Department, I extend to you a sincere vote of appreciation for your interest in our problems and for your wholehearted cooperation.

The Fire Department also expresses its thanks to the members of the Municipal Council of the City of Newark, who showed a sincere interest in the problems of our Department and cooperated by their favorable response. We also express our thanks to the Hon. Ferdinand J. Biunno, Business Administrator, the Hon. Dominic V. Miceli, Assistant Business Administrator, the Hon. Philip E. Gordon, Corporation Counsel, and to the Directors of all departments for their splendid cooperation.

The Fire Chief, all Officers and Men of the Department, and the Administrative Staff are to be commended for their efficient and dedicated services and attention to duty during the year.

The Civil Defense Auxiliary Firemen and the Bell and Siren Club rendered valuable and outstanding service and are to be commended for their devotion and civic-mindedness. To them I express the sincere thanks of every member of the Department.

F i r e D e p a r t m e n t

Director's Report (Continued)

- 5 -

To the Chaplains and the Department Surgeons, for their outstanding contributions in administering to the needs of the men, we owe a debt of gratitude. We also extend our thanks to the members of the Fire Department Glee Club and the V.F.W. Color Guard for their contributions toward the success of various activities of the City.

Respectfully yours,

JOHN P. CAUFIELD,
Director, Fire Department.

Fire Department

ANNUAL REPORT
JOSEPH M. REDDEN, FIRE CHIEF

Hon. John P. Caufield, Director
Fire Department
Newark, New Jersey

Dear Sir:

I am pleased to forward to you the Annual Report of the Fire Department for the year ending December 31, 1968. The reports of the various bureaus listed herein attest to the continuing effort put forth by the Department.

The year 1968 was the busiest in the history of the Department from the standpoint of total alarms, working fires and multiple alarms. In spite of this abnormally heavy workload, with injuries to fire fighting personnel amounting to 474 in the line of duty, the officers and members of the Department operated with professional efficiency, protecting the lives and property of the citizens of the City.

Of special note during the year 1968 were two instances, on April 9, and again on April 20, when it became necessary for me to declare a fire emergency in the City and call upon the Department of Civil Defense and Disaster Control to augment the firefighting forces. The response from the four counties of Essex, Morris, Union and Hudson in sending fire fighting units into the City was carried out with maximum efficiency. Without this response and the high degree of coordination between Newark personnel and the personnel of the many fire departments from neighboring towns, the fire damage would have been much more widespread than was actually suffered.

New apparatus delivered to the Department in 1968 was as follows:

2 - 1000 G.P.M. Pumpers assigned to Engine Cos. 2 and 9.
1 - 4-door Falcon Sedan for Fire Alarm and Radio
1 - Station Wagon for Deputy Division 1

The following apparatus is now on order and will be delivered in 1969:

4 - 1000 G.P.M. Pumpers, diesel powered
4 - 100 ft. aerial ladder trucks, diesel powered.
Pick Up Truck for Special Service
Van type truck for Training Academy.

RECOMMENDATIONS

The manpower shortage being the most critical of all problems facing the Department, I again recommend an overtime program or an increase in the Table of Organization to provide minimum roll calls consistent with effective fire fighting operations.

Fire Department

Chief's Report (Continued)

- 2 -

I wish to express my appreciation to the Officers and Members of the Department for their dedicated service and the cooperation rendered throughout the year.

I also wish to express my appreciation, through you, to Mayor Hugh J. Addonizio, the Members of the City Council, the officials of the various city departments, members of the Press and radio, Officers and Members of the Bell and Siren Club, for the courtesy and assistance rendered the Fire Department during the year.

Respectfully submitted,

/s/ Joseph M. Redden

JOSEPH M. REDDEN,
Fire Chief, U.F.D.

FIRE PREVENTION BUREAU

Annual Report for the year 1968
submitted by
Deputy Chief Harold B. Davis

Reports in detail from the Bureau of Combustibles, Arson Squad and Fire Loss Record Bureau, which comprise the Fire Prevention Division, have been submitted. I respectfully forward this report as to the additional activities of the Fire Prevention Bureau.

Through efforts of the Fire Prevention Division and members of the Fire Department, a new Fire Code was adopted by the City of Newark on April 3, 1968. This code is the American Insurance Association code (formerly the National Board of Underwriters), and is used nationally. With the new code, we are able to take advantage of the scientific and engineering skill of nationally recognized authorities, such as the National Fire Protection Association and other recognized authorities. Our code now states that compliance with standards set by these recognized authorities is accepted as *prima facie* evidence of compliance with the Fire Prevention Code.

The Hotel Fire Safety Law which placed the responsibility for enforcing fire safety in hotels on the Chief of the Fire Department, has been repealed and replaced by a new law entitled "Hotel and Multiple Dwelling, Health and Safety Act", which is to be enforced by the State. Members of the Fire Prevention Division appeared in Trenton at hearings on this law to give the Fire Department's point of view.

Prosecution of hard core violators continued. Last year, 104 violators were taken to court, probably the greatest number in our history. It is still our feeling that when an intelligent appeal to reason fails, it is necessary to institute court action. Any code or law is only as good as its enforcement.

The policy of specialization in inspections has been continued and we hope to expand it in the future.

The keeping of statistics and records for the Arson Squad and Bureau of Combustibles has been improved to make them more comprehensive and insuring greater accuracy.

Collection of permit fees has been kept up-to-date by means of a monthly inventory. As a result, we have no long-standing delinquents.

In-service violations and complaints from the public are now properly recorded and are given priority by fire inspectors.

Two members from the Fire Prevention Division (one from the Arson Squad and one from the Bureau of Combustibles) are now attending Newark College of Engineering. Upon completion of this one year course, they will be given a certificate in Fire Prevention Technology. Last year, two of our other men completed the course. In addition to this, 13 members of the Arson Squad attended an intensive course in police procedures for one full week at the Training Academy. This course was conducted by the staff of the Newark Police Department.

Throughout the year, thousands of pieces of Fire Prevention literature were distributed within the City. In addition, articles alerting the general public to various fire hazards were sent to all local newspapers. Spot announcements acquainting listeners with the hazards of fire were also made on radio and television.

Fire Prevention Bureau (2)

During Fire Prevention Week displays illustrating the hazards of fire were put up at the Prudential Mall, Main Post Office, City Hall Lobby, Mutual Benefit Insurance Company, Newark Airport Terminal and Bell Telephone.

A mobile display with a loud speaker emphasizing the danger of leaving children unattended, also cruised the city's streets.

Speakers from the Speakers Bureau visited schools and gave lectures and demonstrations. Fire drills were run in all schools.

Movie trailers advertising Fire Prevention Week were supplied to all motion picture houses. During this week "Open House" was maintained in all fire houses during the hours of 10:00 A.M. to 4:00 P.M.

Throughout the year, special details were furnished to large sporting events, concerts, carnivals and political meetings. A weekend and evening patrol of hotels and banquets was also initiated.

During the Christmas holidays the Bureau supplied details of fire inspectors to patrol the various business districts during the day and night.

A concerted drive by Arson Squad members during the Fourth of July week resulted in the confiscation of thousands of dollars worth of fireworks and several arrests were made.

ARSON SQUAD

Annual report submitted by
Battalion Chief Joseph L. Starrs
for the year ending December 31, 1968

The following is a report of the activities of the Arson Squad of the Newark Fire Department for the year 1968.

The complete records of all investigations made by Arson Squad personnel, including statements of witnesses, photographs, and all evidence obtained during investigation, are on file in the Arson Squad office.

Certificates of analysis of evidence recovered at fires, evaluated by the Newark Police Department laboratory or outside agencies, are also on file at the Arson Squad office.

All of the above-mentioned records are available at any time to the proper authorities for Grand Jury, court trial or deposition purposes.

As in former years, the Arson Division has worked in conjunction with the American Insurance Association, National Fire Protection Association, Essex County Prosecutor's Office, State Labor Department, New Jersey Motor Vehicle Bureau, Federal Bureau of Investigation and other state and national agencies in many of our investigations.

In 1968, a close liaison was established between the Essex County Prosecutor's office and the Arson Squad, following the death of Dr. Martin Luther King. At that time a rash of serious fires followed his assassination. Prosecutor Joseph P. Lordi assigned Assistant Prosecutor Nicholas Caprio, and Detective James P. Graham to work in close association with the Arson Squad, to aid in investigations and to advise on legal steps to be taken in the prosecution of alleged suspects in Arson cases.

Sheriff Ralph D'Ambola assigned two detectives, Robert Kenny and Joseph Tutela, to assist the Arson Squad in every manner possible. These two men worked with the Arson Squad from April through Labor Day. They have since returned to their regular assignments with the Sheriff's Office.

The Arson Squad maintains a regular association with our own Municipal Bureaus, the Newark Police Department, Youth Aid Bureau, Board of Education, and the Bureau of Combustibles. These departments have aided us in many arson investigations.

FIRE INVESTIGATIONS

The work load of the Newark Fire Department for the year 1968 was the greatest in the history of the Fire Department.

The fire fighting force showed increases over 1967 in the following categories: Bell alarms answered, Signal 5's answered, actual fires extinguished, and multiple alarms.

Similarly, the Arson Squad showed increases in the investigation of fires of all types, false alarms, multiple alarms, complaints and deaths at fires.

Following is a breakdown of some of these increases.

Arson Squad (2)

<u>FIRE FIGHTING FORCES:</u>	<u>1967</u>	<u>1968</u>	<u>% Increases</u>
Bell Alarms Answered	7235	10395	43.6
Bell Alarms Actual Fires	4448	5755	29.3
Signal 5 Alarms answered	3953	4876	23.3
Signal 5 Actual fires	2274	2806	23.4
Multiple Alarms	40	79	97.5
Total Fires Worked	6722	8561	27.3

ARSON SQUAD:

Fire Investigations	671	1048	56.1
False Alarms Investigated	1702	2991	75.7
Multiple Alarms	40	79	97.5
Deaths at Fires	25	29	16.0

FALSE ALARMS

In the columns above, false alarms show an increase in number of 1289 over 1967. However, the ratio of false alarms to Bell Alarms answered shows an increase of 5.2% for the year 1968, from 23.5% in 1967 to 28.7% in 1968. This figure, 28.7% of all alarms sounded is still below the national average for cities the size of Newark.

The false alarm situation in general has increased in all categories: street boxes, telephone calls, and school fire boxes. False alarms from school boxes have shown a marked increase for 1968, and school authorities are now taking measures that they feel will eventually curtail these to an accepted minimum.

In several joint meetings of the Fire Department with the Board of Education, the entire school problem concerning Fire Department response, has been discussed, and planned steps are being taken regarding the boxes and detection systems to alleviate the condition. Sensitivities of detectors are being checked and adjusted, problem locations of indicators are being changed, and in some schools, numbers of fire boxes are being reduced or relocated. A better supervision by the faculty in corridors and hallways is being instituted. All of these measures should make for a reduction in Fire Department response to schools.

Statistics on schools show the following:

	<u>1967</u>	<u>1968</u>	<u>% Increases</u>
Fire Department Responses	349	691	98.0
False Alarms	123	304	147.0
Actual Fires	8	44	450.0
System malfunctions	218	343	57.3

SUMMARY OF STATISTICS

Fires Investigated	1048
Complaints Investigated	62
False Alarms Investigated	2991
Out of City Investigations	0
Total	4101

Included in the above total are:

2nd Alarm Fires	52
3rd Alarm fires	19
4th Alarm Fires	5
5th Alarm Fires	2
6th Alarm Fires	1
Court Appearances	124

	\$4,408,062.68	\$1,375,403.39

Combined Building and Content Loss: \$5,783,466.07
Vehicle Loss: 146,900.00
Total Loss: \$5,930,366.07

Per Capita Loss \$14.64
(Based on 1960
Census Population
405,220)

Fire Loss Record Bureau (2)

Procedures of the Fire Loss Record Bureau:

1. Obtain daily record of fires from Fire Alarm Operator's daily alarm sheet.
2. Check with companies first due.
 - a. Location by street.
 - b. Location in building .
 - c. Extent of involvement.
 - d. Owner and tenancy.
3. Writing and filing of permanent record.
4. Inspection of premises by a member of this detail.
 - a. Recheck of points "a" to "d" above.
 - b. Insurance data as to coverage and notification of owners.
 - c. Names of insurance companies and agents involved.
 - d. Whether or not adjuster has been engaged, and name of same.
5. Interview by personal call from this office to verify above "c" and "d".
6. Permanent record of losses and monthly total of losses.
7. Annual written report to Fire Chief.

This detail is often called on for information which may not be available in other forms, and occasionally has access to information which may benefit certain investigations made by other city divisions or departments.

This detail has a wide acquaintance with insurance carriers and agents; in certain instances it may deal directly with home office of the insurance carriers.

In April 1964, we put into operation a new program with the insurance carriers. This program is an attempt by both the Fire Department and the Insurance companies to reduce fire losses. As of this date the program is continuing and becoming more well known by carriers who underwrite in Newark. It has been met with whole-hearted approval by the executives of the leading companies.

Note: This detail has no legal authority to obtain or force information as to financial settlements from any interested party. The results obtained are strictly by reason of cooperation between this office and insurance companies who suffered losses. In some instances, therefore, it is necessary to estimate certain losses. In the case of incipient fires, certain standards are applied as "Estimated Losses". Where loss is heavy, it is easier to obtain a more accurate record of actual payment to the assured.

oOo

FIRE ALARM AND RADIO DIVISION

Annual Report submitted by
Supt. Arthur J. Moore
for the year 1968

In compliance with the Rules and Regulations of the Fire Department, I herewith respectfully submit the Annual Report of this Division for the year 1968.

General Service Line Force

1. Subterranean cable installed, programmed replacements, circuit extensions. (Feet of conductor). -----	126,920
2. Old cable removed (Feet of conductor). -----	1,850
3. Complete transfers of equipment from old to new poles. -----	33
4. Line wire installed, circuit extensions, replacements, (feet of conductor). -----	21,500
5. Pedestals or stanchions set. -----	4
6. Fire Alarm boxes installed. -----	1
7. Fire Alarm boxes replaced with newer models. -----	0
8. Messenger wire installed (feet). -----	3,000
9. Fire Alarm boxes removed. -----	5
10. Pole construction overhauled. -----	15
11. Subterranean ducts rodded and cleaned (feet). -----	300
12. Construction released on poles. -----	12
13. New cable test or junction boxes installed. -----	5
14. Duct wire installed (feet). -----	400
15. Cable test or junction points rehabilitated. -----	2
16. Pole line faults found and referred to utility owner for correction. -----	27
17. Preventive maintenance patrol of aerial circuits (miles). -----	207
18. Trees trimmed. -----	110
19. Fire house batteries serviced (sets). -----	147
20. Cleared weeds and brush around fire box poles and stanchions to increase visibility. -----	30
21. Tree guards installed. -----	1
22. Reset or replaced stanchions or fire boxes damaged by motor vehicles. -----	7
23. Cross arms installed (circuit extensions, etc.) -----	32
24. Division's motor vehicles washed and serviced. -----	104
25. Janitorial duties (man hours).-----	468
26. Other major job operations completed: Spliced cables, eliminated conductor slack, drilled poles, relocated fire alarm boxes, installed mechanical devices to thwart false alarmists, corrected faults, etc. -----	162
27. Other minor job operations completed: replaced pole insulators, pins, retaped splices, inspected equipment, etc. -----	373
28. Moving material and equipment (man hours). -----	1,560

Box Inspector

1. Fire Alarm boxes inspected, cleaned and tested. -----	691
2. Test box locks replaced with tamper-proof device.-----	14
3. Supervised fire alarm box and stanchion painting. -----	0
4. Fire Boxes daubed with chemicals. -----	502
5. Other minor jobs of preventive maintenance completed: tightened connections, wound box mechanisms, etc. -----	172
6. Other major jobs of preventive maintenance completed: Substituted signal box movements; changed fire box locks; made ready replacement units; etc.-----	59

Fire Alarm and Radio Division (2)

Repair Shop Maintenance Force

1. Audio Hailers inspected and tested-----	12
2. Auxiliary Central Office power plant test operated (hours).-----	#1 57
3. Office panels cleaned, equipment refurbished-----	#2 10
4. Recorders and time stamps inspected and tested-----	2
5. Other major job operations completed: rewired fire alarm boxes and firehouses, repaired electrical apparatus, etc.-----	101
6. Other minor job operations completed: Cleaned office instruments, sharpened tools, conducted tests, maintained shop stock records, etc.-----	132
	1,001

Engineering, planning, miscellaneous

1. Maintained field communication center at fires (hours)-----	21
2. Inspection of field facilities made (locations).-----	135
3. Inspection of systems in private property made.-----	31
4. Private contractors assisted in planning fire alarm systems.-----	12
5. Circuits patrolled (miles). -----	207
6. Schools and institutions surveyed for fire alarm box installations.	6
7. City sites inspected for proposed installation of street boxes,***	0
8. Engineering, planning (man hours). -----	140

Central Office Force

1. Alarms transmitted. -----	17,367
2. False alarms received (Records of these false alarms are kept by the Arson Squad.)-----	2,991
3. Box tests supervised.-----	691
4. Misdirected telephone reports for fire in surrounding municipalities received and conveyed to proper department.-----	8
5. Tests from private fire alarm companies supervised.-----	1,825
6. Tests conducted of Airport fire alarm facilities. -----	730
7. Telephone calls handled over P.B.X. switchboard (approx.)-----	500,000
8. Radio calls handled.-----	180,450
9. Number of circuits completely tested.-----	66,180
10. Miscellaneous reports prepared and distributed.-----	8,000
11. Individuals and agencies dispatched to multiple alarm incidents by telephone.-----	2,280
12. Other minor job operations completed: Performed janitorial duties, performed bookkeeping functions, etc.-----	2,555

SPECIAL SERVICE AND SUPPLY COMPANY

Annual Report submitted by
Deputy Chief Henry L. Schoettly
for the year 1968

The Special Services Division operated as usual on a 24-hour-a-day basis, some personnel working in shifts and some working during the daytime only. During periods of emergency such as severe snowstorms and civil disturbance, extra men were held on duty, including the "day men". Many and varied activities consistent with the efficient operation of the department were engaged in and carried out by the various subdivisions of Special Services as follows:

DELIVERY AND PICK-UP SERVICE. Deliveries and pick-ups were made both day and night. However, a new system was instituted for the purpose of conserving manpower, gasoline, and wear and tear on delivery trucks. In the new system, trucks are sent out at 10:00 A.M. and again at 2:00 P.M. to cover the department, rather than sending out a truck each time one or two deliveries have to be made. Most pick-ups and deliveries are not of an emergency nature. In the event that they are, a truck is dispatched immediately, at any hour of the day or night. Items handled are such things as housekeeping supplies, tools, equipment, extinguishers, oxygen cylinders, tables, chairs, lockers, rock salt, hose, ladders, and many others requiring transportation.

Fire apparatus needing repair were picked up and taken to the Bureau of Motors garage and extra apparatus taken from their places of storage and delivered as replacements.

MESSENGER SERVICE. The department messenger covered his prescribed route daily, except weekends and holidays, going to all chiefs' quarters and Fire Headquarters. He also performed messenger service on several other occasions on department business.

FIRE EMERGENCY SERVICE. Special Service personnel responded to multiple alarms of fire on several occasions with gasoline and motor oil for the apparatus at work at the fire. They also responded, when specially called, with such equipment as the smoke ejector, the Hi-Ex Foam unit, the floodlight truck, foam, wetting agents, hose, etc. At times they picked up hose, ladders, and other equipment left at fires by the companies which were obliged to leave the fire scenes hurriedly for one reason or another.

The Hi-Ex Foam unit and floodlight truck were operated at fires by Special Service personnel.

GAS MASK SHOP. Masks were ordered, received and assigned to companies and chiefs as needed. Mask parts were ordered and kept on hand for the repair of masks when necessary. Repairs were also made on E & J resuscitators, their cases, and the cases of masks.

In December of 1968, all timers on filter masks were replaced by check valves. This will effect a considerable monetary saving since the timers cost \$15.00 each while check valves cost \$9.60.

Also, window type canisters can be, and are, now used with the masks with check valves, and give the wearer a more accurate indication of the condition of the canister when working in a smokey or gas-laden atmosphere.

Special Service and Supply Company (2)

In June 1968, a gradual change-over was begun whereby waist and neck straps are issued to companies to replace canister holders as the holders wear out. All canisters now being purchased have D rings to accomodate the straps. This will also effect a considerable monetary and man-hour saving in that the canister holders cost \$6.50 each while the straps cost \$2.50 per pair, and the holders required frequent repair whereas the straps might need only the replacement of harness snaps from time to time. The canisters with D rings cost no more than the ones without D rings.

CANVAS SHOP. Besides repairing canister holders, many canvas items were made or repaired including mask box covers, chain saw sheaths, hose box covers, covers for the control pedestal on ladder trucks, turret nozzle covers for the fire boat, etc. Salvage covers were also repaired and patched.

STOCK ROOM: All tools, equipment, devices and supplies (except those ordered directly through Fire Headquarters or by the Hose Shop) were ordered, received and checked, recorded, stored, and distributed as needed to the fire units and chiefs through the delivery service.

Several items, to be ordered, had to be researched as to quality, proper type, service facilities and price by contacting, personally, or by phone, the manufacturers, agents or suppliers concerned. In some instances it was necessary to make drawings to more clearly specify the requirements in the items in question.

Arrangements were made for the outside repair of equipment which Special Service is not able to handle such as portable pumps, portable generators, sharpening of chain saws, retoothing of carbide-tipped circular cutters for K-12 Partner cutters, explosimeters, etc.

The supply room personnel repaired porto-lites, flash lights, desk lights, extension cords and many other items. They also made special belts and straps, tested salvage covers, made arrangements with the carpenter shop for replacing broken handles on axes, plaster hooks, hammers, etc., and for the construction of hose boxes, skid-load panels, special cases for equipment, and other needs of the department.

APPARATUS MAINTENANCE. All fire apparatus were tested in accordance with accepted procedures. Arrangements were made for repairs to, or replacement of damaged or defective apparatus and other department vehicles. A preventive maintenance program was conducted, with the cooperation of the Bureau of Motors, throughout the year in that each fire apparatus was called in for oil change, greasing, and general inspection approximately every two months. From defects that were found, it can be logically concluded that several break-downs, some accidents and personal injuries, and some major and expensive repairs were prevented.

Specifications for new fire apparatus and other department vehicles were drawn up, in conjunction with the Chief of the Department and the Bureau of Motors. This activity and the acceptance of the vehicles often required meetings with the manufacturer's agent or representative concerning acceptance tests, malfunctions and deviations from specifications.

Special Service and Supply (3)

The Supervisor of Apparatus, heading this sub-division, also conducted an extensive "Driver Education" program, approved several new drivers and tillermen, and conducted 351 lectures and demonstrations concerning the proper operation of internal combustion engines, fire pumps, aerial ladders, etc.

HOSE SHOP. The Hose Shop kept all companies properly supplied with the various sizes and types of fire hose. All hose in service in the department was tested, and over-age hose and defective hose were taken out of service. Damaged hose was repaired (when possible), as were nozzles, valves, adapters, hose fittings, brackets, and miscellaneous other equipment.

New hose, nozzles and other equipment were ordered as necessary in quantity sufficient to insure a reasonable reserve on hand at all times. Some difficulty in the latter was experienced during and as a result of the civil disturbance in April, but the supply of equipment was brought back to normalcy in August.

GENERAL. A new, closed, 1-ton truck was placed in service to replace an open half-ton truck which was twenty years old, and another one-ton truck has been requested and is expected to be placed in service in 1969. A new chief's car has also been requested to replace a Dodge which has been in service since 1962.

Twelve portable electric generators have been received and will be placed on all hook and ladder trucks as soon as possible. Each truck will also be issued three floodlights for use with the generators, for providing light at night fires. It is expected that the present floodlight truck, which is now some thirty years old, will be taken out of service as soon as the generators and lights are issued to the ladder companies.

During the year, several cellars, yards, depressions, manholes etc., were pumped out. The gasoline engine on one of the portable pumps wore out and was replaced by a new engine.

Floodlighting was supplied for the Independence Day celebration at City Stadium and other events in the City.

Arrangements were made with the Purchasing Department for the sale of over-age and defective hose whenever a sizable amount was accumulated in the Hose Shop.

Meetings were held for the officers, and for officers and men, from time to time for the discussion of problems and of procedures to increase the operating efficiency of the unit.

There was an unusually large turn-over of personnel during the year, and there were four retirements and two deaths of officers. This, plus a considerable amount of illness, caused a critical shortage of manpower in this unit.

A new card system was worked out, in conjunction with the Water Department, for more accurate reporting and recording of defective hydrants and their repair.

Each sub-division of Special Service maintained records and file systems and submitted the various required reports consistent with its duties and activities; engaged in the clerical work, correspondence and telephone communications essential to operations; and performed the housekeeping duties necessary to keep its quarters clean and in a presentable condition. Annual inventory and statistical form reports accompany this report and will serve as appendices in clarifying information contained herein as to number of hours, number of times, number of items, etc.

ANNUAL REPORT
Submitted by
Supervisor of Apparatus
Daniel J. Tauriello

The following duties were performed during the year 1968.

Lectures and demonstrations given	351
Preventive maintenance work done on apparatus	256
Apparatus changed over for major repair work	225
Drivers certified	30
Pumpers service tested	All
Aerial ladders checked and inspected	All
Multiple alarms and other incidents responded to	35

Fire companies in service:

Enging Companies	25
Hose Wagons	10
Fireboat	1
Aerial trucks	11
Snorkel	1
Salvage Companies	2
Rescue Squad	1
Spare engines	6
Spare trucks	2
Chief of Department	1
Deputy Divisions	2
Battalion Districts	5

HOSE DIVISION
Annual Report for 1968
submitted by
Peter J. Carolan
Supervisor of Apparatus

The following report indicates the amount of fire hose in actual service, new hose in reserve, used hose on hand as of December 31, 1968.

Hose Inventory

2½" In Service with companies	1210 - 50 ft. lengths	60,500 ft.
2½" In Reserve (New Cotton Poly)	5 - 50 ft. lengths	250 ft.
2½" In Reserve (Used Hose)	83 - 50 ft. lengths	4,150 ft.
2½" In Reserve (Old Hose)	<u>150</u> - 50 ft. lengths	<u>7,500</u> ft.
	1,448 - 50 ft. lengths	72,400 ft.
1½" In Service with companies	716 - 50 ft. lengths	35,800 ft.
1½" In Reserve (New)	18 - 50 ft. lengths	900 ft.
1½" In Reserve (Old)	<u>26</u> - 50 ft. lengths	<u>1,300</u> ft.
	760 - 50 ft. lengths	38,000 ft.
3" In Service with Companies	107 - 50 ft. lengths	5,350 ft.
3" In Service with Companies	Various Lengths	2,100 ft.
3" In Reserve (New) 100% Poly	5 - 50 ft. lengths	250 ft.
3" In Reserve (New)	26 - 50 ft. lengths	1,300 ft.
3" In Reserve (New) 100% Poly	<u>2</u> - 75 ft. lengths	<u>150</u> ft.
	Various	9,150 ft.
4½" In Service with Companies	45 - 15 ft. lengths	675 ft.
4½" In Reserve (New)	4 - 30 ft. lengths	120 ft.
4½" In Reserve (Old)	<u>4</u> - 15 ft. lengths	<u>60</u> ft.
	Various	855 ft.
3/4" In Service with Companies	246 - 50 ft. lengths	12,300 ft.
3/4" In Reserve (New)	16 - 50 ft. lengths	800 ft.
3/4" In Reserve (Old)	<u>4</u> - 50 ft. lengths	<u>200</u> ft.
	266 - 50 ft. lengths	13,300 ft.
6" In Service with Companies (Hard Suction)	42- 10 ft. lengths	420 ft.
6" In Reserve (New)	1- 10 ft. length	10 ft.
6" In Reserve (Old)	<u>4</u> - 10 ft. lengths	<u>40</u> ft.
	47 -10 ft. lengths	470 ft.
5" In Service with Companies (Hard Suction)	22 - 10 ft. lengths	220 ft.
5" In Reserve (New)	4 - 10 ft. lengths	40 ft.
5" In Reserve (Old)	<u>1</u> - 10 ft. length	<u>10</u> ft.
	27 - 10 ft. lengths	270 ft.
4½" In Service with Companies (Hard Suction)	26 - 10 ft. lengths	260 ft.
4½" In Reserve (New)	<u>4</u> - 10 ft. lengths	<u>40</u> ft.
	30 - 10 ft. lengths	300 ft.
2½" In Service with Companies (Hard Suction)	2-10 ft. lengths	20 ft.

Hose Division (2)New Hose Received

4½" Newitt CRL	6 - 30 ft. lengths	180 ft.
3" Blaze Guard CRL	32 - 50 ft. lengths	1600 ft.
3" Eureka 100% Polyester (2½" Couplings)	50 - 50 ft. lengths	2500 ft.
3" Eureka (2½" Couplings)	3 - 75 ft. lengths	225 ft.
2½" Eureka 100 % Polyester	60 - 50 ft. lengths	3000 ft.
1½" Eureka CRL	50 - 50 ft. lengths	2500 ft.
1½" Boston (Cotton Poly)	20 - 50 ft. lengths	1000 ft.
		11,005 ft.

New Hose Issued

3" Blaze Guard 100% Polyester	32 - 50 ft. lengths	1600 ft.
3" Eureka 100% Polyester	50 - 50 ft. lengths	2500 ft.
2½" Blaze Guard (Cotton Poly)	5 - 50 ft. lengths	250 ft.
2½" Blaze Guard 100% Polyester	52 - 50 ft. lengths	2600 ft.
2½" Eureka 100% Polyester	60 - 50 ft. lengths	3000 ft.
1½" Blaze Guard CRL	101 - 50 ft. lengths	5050 ft.
1½" Eureka CRL	50 - 50 ft. lengths	2500 ft.
1½" Boston (Cotton Poly)	2 - 50 ft. lengths	100 ft.
3/4 Eureka (Booster Hose)	7 - 50 ft. lengths	350 ft.
		17,950 ft.

Hose Repaired

3" Various lengths	446 ft.
2½" Hose - 150 - 50 ft. lengths	7,500 ft.
1½" Hose - 134 - 50 ft. lengths	6,700 ft.
3/4" Booster Hose - 27 - 50 ft.	1,350 ft.
4½" Soft Suction - 44 - 15 ft.	660 ft.
	16,656 ft.

Hose Tested

3" Hose - 94 ft. Various Lengths	4,387 ft.
2½" Hose 1,347 - 50 ft. lengths	67,350 ft.
1½" Hose - 836 - 50 ft. lengths	41,800 ft.
3/4" Booster - 201 - 50 ft. lengths	2,050 ft.
	115,587 ft.

Number of valves, nozzles , adapters, equipment and miscellaneous articles repaired or installed - total 381.

000

Special Service Performance Report
Submitted by Herbert D. Planck, Battalion Chief
Annual Report for the year 1968

Number of Alarms Answered	43
Number of pickups and deliveries made	10,338
Smoke Ejector on Special Calls	0
Hi-Ex Expansion Foam Unit on Special Calls	1
Gasoline distributed at fires	1,420 Gal.
Oil distributed at fires	2 qts.
Floodlight on special calls and multiple alarms	36
Floodlight cable used (feet)	2,350 ft.
Number of lights used	184
Cellars pumped out	27
Hours spent pumping out cellars	75 hrs. - 15 min.
Number of demonstrations conducted or attended	0
Portolites Repaired	684
Portolite batteries distributed to companies	798
Liquid foam distributed to companies	438 gal.
Foam powder extinguishers filled	48
Oxygen cylinders refilled	388
Scott & M.S.A. air cylinders refilled	69
Masks repaired	453
Canvas-covers for bags, boxes, deck etc. and repairs	89
Salvage covers repaired	4
Duty time flood light	74 hrs.-50 min.
Canisters delivered	1,960
Ladders repaired	46
Ladders repaired (feet)	986

TRAINING DIVISION

Annual Report submitted by
Deputy Chief Joseph J. Drew
for the year 1968

The following report lists the numerous and diversified activities conducted by the personnel of the Training Academy.

ACADEMY TRAINING:

Police Recruit Training:	45 attended	8 man-hours.
Psychophysical Drivers Test:	206 attended	309 man-hours.
Emergency Master Streams:	420 attended	624 man-hours.

FIELD TRAINING:

Drills in Quarters -	13,273
Drills out of Quarters -	1,136
Hours of Instruction -	14,409
Number of Subjects -	480
Man-hours -	68,589

SPECIAL TRAINING:

Aerial operation, preventive care for freezing water, care of tires, maintenance of apparatus, standpipe hook-up and pressures needed for same, siamese for heavy stream appliances, care and operation of pumps, high extinguisher foam unit, air brake system, operation of clutch and driver training, pump operating and maintenance of cooling system, first aid, masks, radiological training, crossing guards, police recruit class, and radio transmitting.

Attendance: 1,515
Man-hours: 2,144

DEMONSTRATIONS:

Fire Prevention Demonstrations (table top) - 21, attendance 2,515, man-hours - 210.

FILMS:

Shown at Academy - 5; attendance - 240; loaned out - 90; attendance - 4,360. Titles of Films - Educational; man-hours-218.

OTHER ACTIVITIES:

First Aid (Instruction on Resuci-anne, and film "Birth of a Baby"; Civilian Defense Truck Driver Training; Newark Police and Junior Police, also Housing Police Aides training in cooperation with the Fire Department; Fire Training - use of extinguishers for schools, hospitals and institutions, business and commercial establishments and industry, preparation for entrance examinations for Fire Department (Candidate School), public relations, speakers, fire prevention, fire safety, job opportunities, Special Training Activities, New Jersey Police Academy. Attendance 44,504, Man/Hours 583.

MEDICAL DIVISION

Annual Report submitted by
Edwin L. Ciccone, M.D.
Fire Department Surgeon
for the year 1968

As Chief Fire Surgeon, I performed my duties according to the rules and regulations of the Fire Department, and at all times fulfilled the requirements of my position.

Throughout the year, I gave prompt attention to all reported illnesses and injuries of my fellow co-workers within my jurisdiction.

I granted sick leaves to members as warranted. Regular additional visits and examinations were made to the sick and injured members until they were, in my opinion, physically able to return to their respective duties.

I also rendered treatment to all members who became ill, whether in line of duty or not.

I attended all multiple alarm fires and other fires where medical services were needed.

Inspections of firehouses were made periodically to check sanitary conditions.

Monthly reports were submitted to the Director and the Fire Chief, listing the names of the members of the Department who were on sick leave.

In addition, special reports were submitted when required, as follows:

Number of house visits	886
Fires attended	293
Men injured in L.O.D.	474
Conferences	58
Men examined, re-examined and appointed	10
Hospital visits	650
Number of Revisits	350
Telephone calls and reports	1976
Visits to firehouses	40

I wish to extend my most sincere thanks to all the Officers and Members of the Newark Fire Department for the courtesy and cooperation rendered to me and to Dr. Carl E. Maffeo, Assistant Department Surgeon, during the past year.

oOo

PHOTOGRAPHIC DIVISION

Annual Report
Submitted by
Fireman Joseph Marino

The Annual Report of the activities of the Photographic Division for the year 1968 is herewith respectfully submitted:

Signal 100 - Arson or suspected	25
Signal 200 - Death at fire	8
2nd Task Force	2
3rd Task Force	6
4th Task Force	10
Public Relations, (Includes appointments, promotions, demonstrations, etc.)	83
Violations, Bur. of Combustibles	6
Reprints, Special Assignments	33
Negatives Made	1972
Prints Made	3673
Assignments	173

000

PLANNING DIVISION

Annual Report submitted by
Deputy Chief Arthur J. Schmidt
and
Captain Joseph T. O'Brien
for the year 1968

As in the past, the Planning Division developed and analyzed data relating to the overall activities and operation of the Fire Department. Extensive and comprehensive records and files are maintained regarding all phases of Fire Department activities. Specifically, information regarding injuries to personnel on duty, and hostile acts by the citizenry against firemen while on duty are being maintained in a running and comprehensive report. This is a new activity of this unit.

During the past year, this Division, along with others, analyzed and evaluated new equipment utilized by the Fire Department. Recommendations regarding the purchase of portable radio equipment, and a protective canopy for Tillerman were made.

A new operation plan for Civil Disturbances was developed, and action pamphlets distributed describing proper actions during these periods. Numerous local and federal agencies were consulted, so that coordinated action during these times can be maintained. During the disturbances of April 1968, members of this Division manned positions at Command Post and Task Force Assembly area.

Meetings with the Newark Disaster Committee were conducted, with a view toward coordinating various agencies during periods when the citizenry must be provided with emergency housing due to fires or other type emergency. A plan utilizing Schools in various parts of the City was evolved and adopted.

Periodic meetings with Civil Defense were attended in an attempt to coordinate activities with that Agency.

This unit cooperated with the Port Authority of New York during the construction of a new fire house in the Port Newark area for Engine Company 32.

Many meetings were held with the City Planning Board and the Newark Housing Authority, regarding the construction of new Fire Houses needed for Engine Companies No. 2, 5, 10, 12, 20, and Truck 5. Consultations with various local architects were held, almost on a weekly basis, so that our needs in the proposed new construction could be met. Plans for a new Fire Department Training Facility were studied, and various local training sites were visited so that the Fire Department's needs in this type facility could be established.

New projects were prepared and submitted to the Central Planning Board for inclusion in the 1969-1974 Capital Budget Program, including the construction of new facilities and the purchase of apparatus and equipment.

Miscellaneous reports and information of Fire Department operations, and statistics relating to these activities were prepared and distributed to other Fire Departments and interested organizations as were requested during the past year.

Such other duties and activities as called for by the Fire Chief and the Director were performed.

Annual Report of the Activities of the
Public Relations Officer
Francis X. McCarthy
for the year 1968

I respectfully report that during the year 1968, as Public Relations Officer of the Newark Fire Department, I answered fire alarms when summoned; prepared press releases; set up television broadcasts at the scene of fires; also, arranged for radio broadcasts.

As Public Relations Officer, I participated in many public functions; visited various civic and fraternal organizations on behalf of the Newark Fire Department, set up programs for the presentation of honor awards.

As Public Relations Officer, I have tried to bring about a closer relationship and a better understanding between the citizens of the City of Newark and the members of the Fire Department.

I wish to express my thanks to the Director and to the Officers and Members of the Fire Department for the cooperation extended to me during the year.

oo

Annual Report
of the activities of the
Catholic Chaplain
The Right Rev. Msgr. Philip T.McCabe
for the year 1968

I attended all multiple alarms of fire in the City of Newark, and administered the Sacraments of the Roman Catholic Church when needed.

I visited hospitals where firemen were known to be patients.

I conducted the blessings at funerals or attended Mass of our deceased members, whether active or retired; also, officiated at funerals of relatives of firemen when requested to do so.

Conducted the Annual Communion Breakfast and Memorial Mass for the men of the Department held in St. Thomas Aquinas Church.

Participated in the Holy Name Federation Holy Hour held in the Sacred Heart Cathedral.

ooo

Annual Report
of the Activities of the
Protestant Chaplain
Rev. Clarence Bleakney
for the year 1968

I attended over thirty-five fires, single and multiple.

I called on every fireman possible who was hospitalized.

It is still my habit to visit fire houses quite regularly.

Each year we hold our Annual Memorial Service on the
third Sunday in October, conducted by the Chaplain.

I attend practically every funeral in our Department, besides
conducting many for members of the families of the Newark Fire
Department.

I remain deeply grateful for all courtesies extended to me
on the part of Firemen and all associated with them.

oOo

Annual Report
of the Activities of the
Jewish Chaplain
Rabbi Horace L. Zemel
for the year 1968

I wish to report that throughout the year 1968, as Chaplain of the Fire Department, to the best of my ability, I have answered fire calls when summoned, participated in public functions, attended the sick and the dying, and in general, lent myself in full capacity as clergyman over all those to whom I minister in whatever contingency my services were called.

The making of this report gives me the opportunity of letting you know that I am cognizant of the many courtesies extended to me in the performance of the duties of my office, and for which I am extremely grateful.

May I wish you and the entire Fire Department a year marked by Peace in the World, Order in our Government, Health in the Home, and Success in every worthwhile effort.

AUXILIARY FIRE RESERVE

Annual Report for the year 1968

Herewith is a report of activities of the Auxiliary Fire Division for the year 1968.

The Fire Department Civil Defense representative attended all monthly meetings of the Civil Defense Technical Operations Committee, as well as representing Fire Director Caufield at regular meetings of the Defense Council.

In addition to volunteer services at various Fire Stations in the city, the Auxiliaries participated in Mothers March of Dimes, The Crispus Attucks Parade, and in field drills.

The Fire Services representative participated in five Civil Defense control center simulated disaster exercises as directed by the Civil Defense Director, and well as one Control Center exercise directed by the New Jersey State Civil Defense Association.

Exchanged damaged rubber goods for active Auxiliary Firemen, checked on Company Auxiliary Log Books, supplied Auxiliary Companies with monthly report forms, kept records of individual voluntary services, prepared and sent letters of information and/or direction to membership, arranged for two general meetings of the Auxiliaries, performed all services required in record keeping, filing, monthly reports to Civil Defense Director, etc.

In addition, began preparation of an up-dated Standard Operating Procedure during Civil-Defense-directed disaster operations, interviewed, fingerprinted and processed new recruits.

Picked up loaned equipment, whenever possible, from inactive Auxiliaries for re-use.

Processed all grievances and/or complaints from the membership.

Inventoried C.D.Auxiliary supplies twice and maintained a running inventory.

In 1968, 40 new recruits were added to the service. Active members - 151; Inactive, but available - 165.

Auxiliary Firemen gave the following man-hours of service during 1968:

Number of visits to quarters	3,375
Man-hours in quarters	18,545
Number of Alarms answered	4,989
Man-hours at fires	3,066

Upon recommendation of Captains in the Fire Department, several members of the Auxiliary Fire Service received letters of commendation from the Director in recognition of assistance rendered the Fire Department.

BELL AND SIREN CLUB

Annual Report for the year 1968

The Bell and Siren Club, organized in 1949, is a non-profit, voluntary group, dependent upon membership dues, its annual social function and the contributions of friends to finance its activities and acquire and maintain its equipment.

Membership is limited to 50 active members whose conduct must adhere to the official club Code of Operation. Public officials, candidates for public office or any fire department employees are not eligible for membership.

The Club serves free refreshments of coffee, tea, hot soup, milk, etc., from a mobile unit, to firemen and fire victims at the scene of fire, inside the fire lines.

The equipment it uses is quartered in Newark fire houses, courtesy of the Mayor and the Newark Fire Department.

Its service record for 1968 is as follows:

Responses to Task Force 2	---	13	Parade So. Orange	---	1
" " Task Force 3	---	12	General Alarm East Orange	1
